## ACC 211/212: Double Entry Logs

You can navigate to specific sections of this handout by clicking the links below.
Journal Entries: pg. 1
Adjusting Journal Entries: pg. 4
Closing Entries: pg. 5
Example Problem: pg. 6

## Journal Entries:

- Credits are always indented (account name and value).
- The sum of debits will always equal the sum of credits.
- The month name is required only for the first entry of the month and the first entry of a page.
- A user can insert a comment (in parenthesis or italics) below an entry; documentation is extremely important for tracking account transactions.
- Account names and PR numbers are linked. Make sure account names agree with PR numbers.
- Create balance based T-accounts to track account balance (see following page).

## Merchandising:

- Merchandise Inventory represents the cost of the goods.
- There are two entries when goods are sold: a revenue adjustment and an inventory adjustment.
- Discount terms example: $2 / 10, \mathrm{n} / 30$. Buyer receives a $2 \%$ discount if paid within 10 days, or they can pay full (net cost) within 30 days.
- If company pays a bill in a discount period, adjust Merchandise Inventory to accurately record the cost of the goods purchased.
- When selling goods, what inventory method is being used?
- LIFO, FIFO, Weighted Average, or Specific Identification
- When working with Returns and Allowances, consider:
- Are goods being returned? Are they reusable?

## Tips for Official Statements:

- Header - no abbreviations and capitalize in same fashion as a title.
- Pay attention to the period of a statement.
- Only the first and last amount of a column receives a dollar symbol.
- The final value of a document receives a double underline.
- Negative values are represented in parenthesis.
- If a section of a statement has multiple applicable accounts, use a separate column to calculate a total instead of using each value individually.
- Income Summary $\rightarrow$ Statement of Owner's Equity $\rightarrow$ Balance Sheet

## Adjusting Journal Entries:

- Adjusting entries will never involve the cash account.
- Adjusting entries are used to record changes in accounts that have not been previously acknowledged (depreciation, inventory adjustments after an audit, etc.).
- TIP: Consider the original entry for prepaid expenses and unearned revenues.
- Example: DR-Prepaid Expenses (asset) and CR-Cash for the purchase.
- There are four categories of adjustment entries:

Prepaid Expenses - These entries are used to record the usage of prepaid expenses/assets. For example, XYZ Inc. purchased a one year insurance policy for $\$ 1200$ effective Aug 1 ${ }^{\text {st. }}$. Calculate the dollar equivalent of the policy that has expired. The entry as of Dec 31 is:
$(5$ months $) \times(\$ 1200 / 12$ months $)=5 \mathrm{mo} \times \$ 100 /$ month $=\$ 500$.

```
Dec. 31 Insurance Expense 500
    Prepaid Insurance

Unearned Revenue - These entries are used to record the transition of pre-collected funds to earned revenue. For example, XYZ Inc. sells 12 -issue a year magazine subscriptions. A distributor purchased 1000 subscriptions for \(\$ 48,000\) effective May \(1^{\text {st }}\). The entry as of Dec 31 is:
\((8\) months \() \times(\$ 48,000 / 12\) months \()=8 \mathrm{mo} \times \$ 4,000 / \mathrm{mo}=\$ 32,000\)
Dec. 31 Unearned Subscription Fees 32,000 Subscription Fees Earned 32,000

Accrued Revenue - These entries are used to record revenue that has not been billed or recorded. For example, XYZ Service Inc. performs an emergency repair for a client over holiday break. The job has been performed but will not be billed until the holidays are over. The entry as of Dec 31 is:

Dec. 31 Accounts Receivable - Client 1,500
Service Revenue 1,500

Accrued Expense - These entries are used to record expenses that occurred within the fiscal year, but will not be paid until after the fiscal year's end. For example, XYZ Inc. has three employees with a combined flat salary rate of \(\$ 4,200\) every two weeks (includes weekends). The pay period was from Dec 23 to Jan 3. Even with 9 days falling in the past fiscal year, the workers will not be paid until Jan 9. The entry as of Dec 31 is:
\((9\) days \() \times(\$ 4,200 / 14\) days \()=9\) days \(\times \$ 300 /\) day \(=\$ 2,700\)
Dec. 31 Salaries Expense 2,700 Salaries Payable 2,700

ACADEMIC CENTER
FOR EXCELLENCE

\section*{Closing Entries:}
- Perform closing entries after all adjusting entries have been recorded.
- Use Adjusted Trial Balance/Pre-Closing Trial Balance.
- Revenue, Expenses, and Owner Withdrawals are temporary accounts; they do not "roll over" to the next year.
- Revenues have a normal credit balance. Debit the revenue account to empty the balance. Expenses have a normal debit balance and must be credited for closing.
- The Income Summary has a normal credit balance with a net gain and a debit balance with a net loss-the third entry may not always have capital as a credit.
1. Close revenue accounts to income summary (Debit Revenues)

Dec. 31
\begin{tabular}{lr} 
Sales & 50,000 \\
Service Revenue & 12,000 \\
Interest Earned & 3,000 \\
\multicolumn{1}{l}{ Income Summary } &
\end{tabular}

65,000
2. Close expense accounts to income summary (Credit Expenses)

Dec. 31 Income Summary 65,000
Cost of Goods Sold 35,750
Rent Expense 12,000
Utilities Expense 2,250
Wages Expense 15,000
3. Close income summary to owner's capital
\begin{tabular}{cccc} 
Dec. 31 Income Summary \\
Owner's Capital & 5,000 & 5,000
\end{tabular}
4. Close withdrawals to owner's capital

Dec. 31 Owner's Withdrawals 1,200
Owner's Capital 1,200

Note: These are fabricated figures; use the figures off of an Adjusted/Pre-closing Trial Balance.

\section*{Example Problem:}

\section*{Part I}
C. J. Sparrow created a retail store, Deep Treasures, that specializes in pirate merchandise. The following statements are business transactions within the first two weeks. Prepare journal entries for the transactions.

Mar. 1 - C.J. Sparrow invested \(\$ 20,000\) cash and merchandise with a total cost of \(\$ 5,000\) into his new business, Deep Treasures Inc.
Mar. 1 - C.J. Sparrow paid \(\$ 4800\) for 12 months rent.
Mar. 2 - C.J. purchases office supplies for \(\$ 250\) cash.
Mar. 3 - Deep Treasures Inc. purchased merchandise with a cost of \(\$ 3,500\) on credit terms \(2 / 10, \mathrm{n} / 30\).
Mar. 4 - Receipts show that the company sold goods for \(\$ 2,500\) that had a total cost of \(\$ 1,250\) to be paid within 30 days.
Mar. 5 - C.J. paid his co-worker \(\$ 500\) for a week of work.
Mar. 8 - Deep Treasures Inc. sold goods with a cost of \(\$ 1,500\) for \(\$ 3,000\) cash.
Mar. 9 - C.J. Sparrow purchased a 2 -year insurance policy for \(\$ 4,800\) cash.
Mar. 10 - Deep Treasures Inc. sold \(\$ 4,550\) worth of goods for \(\$ 8,000\) to be paid within 30 days.
Mar. 11 - Deep Treasures received full payment for the goods sold on March 4th.
Mar. 12 - Deep Treasures paid for the goods purchased on March 3rd (note: credit terms).
Mar. 12 - Deep Treasures received cash for the sale made on March \(10^{\text {th }}\).
Mar. 12 - C. J. Sparrow withdrawals \(\$ 500\) for personal use.

\section*{Part II}
C.J. Sparrow disappears and the business does not make any more transactions for the rest of the year. An internal inventory audit reveals that there is only \(\$ 780\) of merchandise available for sale. Perform adjusting and closing entries for the year end. Also, prepare an income statement, statement of owner's equity and trial balances where appropriate.
